cerned. It is now for our people to say whether they will raise \$35,000 for the When the project was first talked of lut year we confess it looked rather mythical and impractical, but it does not look so now. This \$35,000 can be raised, and it will be the best investment we ever made, to say nothing of the benefits to be derived in the way of morals and culture. If this college is located here it is not to be merely local. It will be an institution of the Presbyterian : for a district of country reaching for hundreds of miles east, west, north and south. The committee estimates that each student brought here would spend annually \$300. This is a reasonable estimate. One hundred students would bring to our midst \$30,000 in a single year, and there can be no doubt that there would be that many from abroad within a few months after the school is started. It is reasonable to say that nearly half the 100 would spend \$500 per annum each. We have no doubt but that the very first year of the existence of the college the \$35,000 which we are asked to contribute would be more than returned in the increased trade which the college itself would bring us. Then the increase in the number of desirable families in our midst would be an important considerstion. Our surroundnig delightful buildly benefitted. Within five years we believe the college would have 300 students from whom we would have an annual income of considerably over \$100,000. These considerations seem what has been done here. We know this college scheme to be entirely practicable, and we know that to secure its best thing we could do with \$35,000 This county and city has never made an nvestment of this kind that did not pay house on Constitution street twentyone years ago we thought we were doing wonders. Half the people nearly declared it a piece of foolish extravarance, and that we could never pay the \$5.000 debt we voted for its construction

wheat county in the state. There are about 25,000 acres of oats in the county which will yield at least sixty bushels to the acre; also nearly one hundred thousand acres of corn, which is now Wichita, Kan., July 8.—Following mostly in tassel, and promises an enormous yield. The heavy rain of Friday rain set in throughout the day night insured to almost beyond a

Blue Grass for Sheep.

We have an inquiry concerning bli grass for sheep. Blue grass makes a grand pasture wherever it will grow, and it will grow in all parts of the United States north of forty degrees of lalitude. The sheep of the blue grass regions of Kentucky make as fine mutton as is produced in the country. ton as is produced in the country. As a pasture grass it is very superior, fur-nishing a full supply through the season, if permitted to get a good start the first year. It is sadly injurious to the gras or any other pasture to turn stock upor it too soon. Pastures should be permit ted to become well set, and in the cas ers are close on the track of the of blue grass, under these circumstance after having been closely nipped. It comes into our northern pastures in many sections of its own accord, and in plan of management of the blue grass commissioner of agriculture for that state. He sowed, either in the autumn or spring months, indiscriminately, a suited his convenience. He usually sow ed with rye, wheat or barley, if sowed in an open field, but if in a woods lot, he
